Summary

Experienced Software Developer with expertise in design, installation, testing and maintenance of software systems. Equipped with a diverse and promising skill-set. Proficient in various platforms, languages, and embedded systems. Experienced with cutting-edge development tools and procedures. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team.

Skills

JavaScript (ES6+) • React • Node.js • PostgreSQL • TypeScript • Nuxt.js • PHP 7 • Rest API

Work Experience

Software Developer

Oct 2021 – present

Zeraf Technologies • Full-time

Addis Ababa, Ethiopia

Technologies: JavaScript • Vue.js • Firebase • API Integration • Nuxt.js

- Wrote code in the Vue, Nuxt, and Node languages to develop a software program and build one of the company's web apps, greencheddar (<https://greencheddar.org>), and achieved excellent system stability.
- Wrote a unit and end to end testing over course of development.
- Recording data, preparing TSDs and repoting it to proper parties.
- Created a data analysis pipeline that increased program efficiency.
- Planned high-end software, improving the overall efficiency of company processes by 40%.
- Deployed built applications to Google Cloud Platform infrastructure, where it can quickly spin up and scale instances as needed.

Backend Developer

May 2021 – present

Ahaz Tech • Part-time

Addis Ababa, Ethiopia

Technologies: Node • PostgreSQL • Stripe • Twilio • Rest API

- Developed a business analytics dashboard that provided real-time revenue and inventory visibility to the front desk.
- Designed and implemented a delivery app. Productivity and efficiency levels increased by 35%.
- Suggested advancement of security and confidentiality of data through the implementation of key processes and protocols.
- Singlehandedly designed and developed a processing platform, which resulted in improved general performance.

Projects

Greencheddar

Oct 2021 – present

15 coworkers

Technologies: HTML/CSS • Tailwind css • TypeScript • JavaScript • Vue

It is a platform founded in **UK,London** that calculates an individual's or a household's carbon footprint and rewards users appropriately. Users will be able to sell and/or buy carbon credits on the platform **marketplace**.

Fetan Delivery

Jun 2021 – present

6 coworkers

Technologies: Rest API • MERN Stack • PostgreSQL • Back-end

It is an on-demand grocery delivery platform in **Addis Ababa** that enables shopping and other household supplies to be **delivered to customers' doorsteps**. FETAN's technology-driven business approach allows it to deliver food to consumers in as little as one hour, making it one of Ethiopia's most promising and forward-thinking companies built on the sharing economy model.

Educations

Bachelor's degree: Computer Engineering

Sep 2015 – Feb 2021 • 5 yrs 5 mos

Jimma University

Jimma, Ethiopia

Grade/GPA: 3.4

Certifications & Awards

Mastering React - Code with Mosh School

Jan 2020

Node.js(Backend) - Code with Mosh School

May 2021
